

Report Overview

Miscellaneous Reports

Monthly Claims Summary

Detailed claiming information per practice (and/or per practitioner) to allow both reconciliation with the PMS invoicing functions and accurate payments to be made.

Monthly Health Targets Summary

Month-by-month tracking of National Health Target performance by practice (or practitioner). This report includes trend analysis as well as peer comparisons within a network.

“Other Asian” Patient List

The ‘Other Asian’ ethnicity group can cause confusion for practitioners utilising CVD Risk Assessment tools; while the Mōhio CVD Risk Assessment accurately prompts for ‘Other Asian’ this is a list of patient that may require a more detailed ethnicity group indicator to be recorded.

Patient Management

A list of patients with incorrect demographic and register enrolment details. This is a live report to ensure maximisation of enrolment prior to register submission.

Long Term Condition Patient List

A report detailing patients with Long Term Conditions and prioritisation of them for relevant PHO programmes.

“Ineligible” Patient List

A report reflecting Ministry of Health advice around patients not eligible for enrolment onto the National Enrolment System (NES).

Annual Influenza List

A report listing patients eligible for but not yet completed their Influenza Vaccination.

CVD Virtual Risk Assessment

A report listing patients not yet completed a CVD risk assessment, but who have the required clinical values to calculate a virtual risk score.

Risk of Hospitalisation Report

A report listing patients at highest risk of hospitalisation based on general practice, PHO and DHB level indicators.

All clinical reports are available with a single click for practice managers or clinicians directly from Mōhio-Forms or MōhioExpress.
